

## **Installation and Maintenance Instructions**

### **Apinox Product Code 091 Close Coupled WC Suite**

#### **Installation**

Mount the WC pan to the wall in the required position using suitable wall fixings and secure to the floor using the clip provided. Dimensions of holes and position of floor clip are shown on technical data sheet.

Mount the cistern in the required position and make all the plumbing connections. Fix the cistern enclosure to the pan and fix to the wall with suitable fixings. Fit the lid to the enclosure using the security type screws provided. The WC pan connector can be fitted via the two side access panels.

#### **Earthing Continuity**

All WC Pans are provided with a number of fixing points on to which an earthing continuity wire with an end terminal can be secured.

#### **Maintenance**

Routine cleaning is necessary to maintain the appearance of stainless steel. Washing with soap or a mild detergent and warm water, applied with a sponge or bristle brush, followed by a clear water rinse is all that is required.

For further information please see our 'Care and Maintenance of Stainless Steel' leaflet.
