

## **Installation and Maintenance Instructions**

### **Apinox Product Code 122 BARIATRIC TOILET**

#### **Installation**

Mount the WC pan to the wall in the required position using suitable wall fixings and secure to the floor using suitable floor anchors (supplied by others).

Mount the cistern (if included) in the required position and make all the plumbing connections. The WC pan connector can be fitted via the two side access panels. Please note that Acorn Powell recommends that minimum mounting heights from the underside of the cistern to finished floor level shall be:

Low level cistern - 675 mm - with front lever operating mechanism

Low level cistern - 925 mm - with push-button operating mechanism

High level cistern - 1750 mm

#### **Earthing Continuity**

All WC Pans are provided with a number of fixing points on to which an earthing continuity wire with an end terminal can be secured.

#### **Maintenance**

Routine cleaning is necessary to maintain the appearance of stainless steel. Washing with soap or a mild detergent and warm water, applied with a sponge or bristle brush, followed by a clear water rinse is all that is required.

For further information please see our 'Care and Maintenance of Stainless Steel' leaflet.
