

## **Installation and Maintenance Instructions**

### **Apinox Product Code 275 Large Inset Wash Bowl**

#### **Installation**

The large inset wash bowl is designed for inseting into counter tops up to 50mm thick.

There are four sizes. Check carefully the cut out hole size required

Make a cut out:

305mm diameter for bowls 335mm overall diameter

365mm diameter for bowls 390mm overall diameter

385mm diameter for bowls 410mm overall diameter

425mm diameter for bowls 450mm overall diameter

A suitable sealant should be applied to the underside of the bowl / surface of the worktop before fitting.

Fit the supplied waste and complete the remainder of the plumbing installation.

#### **Maintenance**

Routine cleaning is necessary to maintain the appearance of stainless steel. Washing with soap or a mild detergent and warm water, applied with a sponge or bristle brush, followed by a clear water rinse is all that is required.

For further information please see our 'Care and Maintenance of Stainless Steel' leaflet
