

## Special Features

- ▲ STAINLESS STEEL ALL-WELDED CONSTRUCTION
- ▲ SATIN FINISH
- ▲ EASY TO USE AND MAINTAIN

## Description

The Double Toilet Roll Holder is manufactured from 304 grade stainless steel. The holder is of all-welded construction with all exposed surfaces polished to a satin finish. The holder is secured to the wall with concealed wall plates. The spindles are chrome plated plastic and incorporate heavy duty springs.

## Operation

The Double Toilet Roll Holder is easily loaded using the spring loaded spindles.

## Installation

Remove concealed wall plates from back of flanges and mounting brackets, loosen the set-screws. Mount each wall plate with the prongs at the top; secure with supplied screws at points indicated by an "S" in the drawing below. Engage mounting brackets onto prongs of wall plates, then secure unit into position by tightening set screws at the bottom of the flanges. Note: centre line to centre line of the concealed wall plates must be within 1.6mm of the dimension shown.
