

**Description**

- Model DF454 is our junior height stainless steel drinking fountain with built in water bottle filling station
- Versatile design allows this unit to be mounted against a wall or free standing
- Grade 304 stainless steel, 1.2mm thick, matt polished finish
- Bottle filling opening sized to take all common 0.5, 0.75 and 1.0 litre bottles
- Rounded corners for safety
- Wall and floor mounting points with a full height shroud to conceal all plumbing
- Bottle filling station is recessed into the unit to prevent vandalism usually associated with swan neck bottle fillers
- Large rear opening for connection to services
- Lockable side door for access to the plumbing connections and fixing points
- Suitable for outdoor use providing the water is isolated and drained down during adverse weather conditions (freezing temperatures)
- 1/2 inch threaded connections on both the drinking fountain bubbler and bottle filling tap

Includes

- WRAS approved press button drinking fountain bubbler tap, on/off operation
- WRAS approved press button bottle filling tap, on/off operation
- Two 32mm waste fittings with flexible waste pipes joined with a T piece to leave a single outlet

Dimensions

- **Height:** 760mm
- **Width:** 300mm
- **Depth:** 300mm
- **Bottom of tap to drip tray height:** 290mm

Delivery

- From stock, usually 1 to 3 working days
