

Model SH524 is our surface mounted stainless steel shower panel supplied as a complete assembly with fitted pneumatic push button valve, spray head and interconnecting pipework terminating with an isolation/service valve. Time flow push button pneumatic valve is adjustable to give 2 to 60 seconds of flow duration. Ideal to be installed in areas that require multiple showering facilities such as leisure centres, sports facilities, campsites, schools, colleges and military barracks. Vandal resistant and polished to a satin finish. Optional powder coated colour finish available at an additional cost. Supplied with either a fixed vandal resistant spray head, or a fixed shower arm with swivel spray head.
